

## SMS-Alarm

### Dialer

## GSM dialer for alarm transfer

SMS Alarm is an alarm unit with a built-in GSM modem for use in the 2G network.

The unit can send a SMS alarm to a preset number.

The GSM modem is mounted in a housing for wall mounting.

The unit has a built-in antenna. A special antenna can be ordered if the unit is mounted in an area of poor reception.

The unit has inputs which can activate the transmitter and the preprogrammed message will be sent.

The unit is universal and can in principle be connected to any potential-free relay output.

#### Technical data

12 V mains adapter supplied. Can also be connected to DC 5-32 V.

#### Standards:

Dual Band GSM 900/1800, GPRS 900/ GPRS 1800

#### SMS Text

4 alarm inputs (2 NO and 2 NC)  
2 programmable relay outputs

Choice of programmable transmit messages.

Programmable phone numbers for alarm transmission (max 8).

#### Operating temperature: -0°C – 55°C

350 mA current consumption during transmission

6.5 mA in sleep mode

#### Dimensions: 125x125x75 mm (WxLxH)

**Weight:** 0.5 kg

**Protection:** IP65

**Part.nr** 1324
